

NEWS LETTER GIRAFFE EDUCATION CENTRE

Greetings from Giraffe Education Centre. This first term has been short with a lot of activities. Most of the activities were educative and the students benefited academically. Students were also able to interact with students from other schools. Some of the activities are listed below:

➤ A VISIT TO KENYATTA UNIVERSITY.

Some students paid a visit to the university during Careers week which is organized yearly by the institution. They were taught about different career choices and entry requirements into university. They also had a chance to go around the university since our principal is an Alumni of the institution.

➤ JOURNALISM TRIP TO MEDIA HOUSE.

The journalism club had an opportunity to visit the media. We visited KU TV & KU radio which is part of Kenyatta university. The visit was organized by our principal. Members met some of the presenters, who are known countrywide, and were able to learn much from them. They also participated in the radio show.

➤ FOOTBALL FRIENDLY MATCHES.

Our football team has won against their opponents. This is due to the excellent training they have been receiving from the coach.

By Benson, Form 4

➤ VISIT TO NAKURU COUNTY.

I wake up energized and full of optimism to perform a chemistry experiment, little did I know that the day was going to be blessed with a great trip in my life. For the first time, I visited Nakuru County, in the great Rift valley. This was after our head teacher identified the top academic performers to accompany a team to a special school called Rongai Agricultural and Technical school. Despite the long travel it was a success. It was full of fun and we saw many natural features, wild life and agriculture projects. We were welcomed by the school principal, Brother James Thiongo and the school farm manager. The highlight of the visit was seeing students rearing livestock; pigs, cattle, rabbits, goats, sheep, chickens as well as intensive small scale production of kale, pumpkins, carrots and egg plants. Students bake scones for the whole school, make sausages, and cook! The KCSE performance in the school was quite impressive averaging a B grade. I sincerely thank those who made this trip possible, just to single out John Newbold. Thank you so much for the love, care and food you provided to us that day. Be blessed.

DOREEN, Form 2

SOLAR PANEL DONATION BY SPONSORS

We are very grateful for the love and generosity shown to us by some of the sponsors. We are able to study even when we don't have electricity and we are assured of security in the dorms at night.

➤ GEC AGRICULTURE PROJECTS

Students are glad and positive about being trained on how to carry out farm activities. We are now able to put the theory into practice on the small plots allocated to us by our agriculture teacher with lots of positive energy. We use good farm management practices like irrigation to ensure our crops grow and produce well. We have just planted our seedlings and we expect good yields. We believe that the skills we are learning are going to be beneficial to our future

lives. Personally, I am passionate about farming. God bless GEC, may this giraffe grow taller and walk highest..... Kudos!!!

By: Isaac, Form 4 student

ACADEMIC CLINIC AT GEC

Giraffe is really heading to the right direction. Thanks to the school for organizing the Academic Day. We got an opportunity to get advice from individual teachers and our parents or guardians. Goal setting, learning plans and motivation really encouraged me to work harder and smarter so that I attain my future goals.

Big thanks again!

Kelvin form 2, GEC- Academic cabinet secretary.
